

BasicMaint Digital Maintenance Assistant

Hard- and Software license to assist your maintenance

- view machine status up to 24 months in the past
- access to technical documents
- reminder of maintenance intervals according to maintenance plan
- chronological service logfile - for your internal maintenance and for FORM+TEST service technicians

Benefits:

- remote inspection - reduction of work in unpleasant environments
- monitoring of previously unmeasurable or hard-to-measure signals
- faster problem-solving --> shorter downtimes, saving on travel expenses
- no interference with the existing IT infrastructure

SmartMaint Digital Condition Manager

Extension package for BasicMaint

- smart alerts based on machine conditions triggered by specific control variables, such as pressure monitoring or oil level, ...
- regular status report about the machine's condition
- status dashboard in the event of machine downtime, such as „in progress“, „date scheduled“, etc.

Benefits:

- no manual analysis required – the platform detects an incorrect machine status
- proactive notifications - time-saving: FORM+TEST is informed early, ideally before a failure occurs, and can initiate the repair process
- no need to contact FORM+TEST actively
